

Standard BioTools Reports Second Quarter 2023 Financial Results

August 8, 2023

Continued operational execution improves revenue growth, margin expansion, and expense reduction

SOUTH SAN FRANCISCO, Calif., Aug. 08, 2023 (GLOBE NEWSWIRE) -- Standard BioTools Inc. (Nasdaq:LAB) ("Standard BioTools", or the "Company"), driven by a bold purpose – *Unleashing tools to accelerate breakthroughs in human health* – today reported financial results for the second quarter ended June 30, 2023.

Selected Financial Results

<i>(Numbers in millions, except percentages)</i>	Quarter Ended June 30, 2023	Quarter Ended June 30, 2022
Revenue	\$27.7	\$18.8 ^(a)
Gross margin	49.2%	23.6%
Non-GAAP gross margin	60.9%	40.2%
Operating expenses	\$31.1	\$43.0
Non-GAAP operating expenses	\$25.2	\$33.8
Operating loss	(\$17.4)	(\$38.6)
Net loss	(\$17.0)	(\$63.5)
Non-GAAP adjusted EBITDA	(\$8.4)	(\$26.2)
Cash and equivalents, restricted cash, and short-term investments	\$143.1	\$212.2

(a) Quarter ended June 30, 2022 includes \$1.6 million revenue offset to establish return reserve for discontinued product line.

Second Quarter and First Half 2023 Financial Highlights Compared to 2022

- Total revenue grew 47% in the second quarter of 2023 and 17% in the first half of 2023.
- Non-GAAP gross margin expanded by over 2,000 basis points in the second quarter of 2023 and over 1,000 basis points in the first half of 2023.
- Non-GAAP operating expenses declined over \$8 million, or 25%, in the second quarter of 2023 and nearly \$18 million, or 26%, in the first half of 2023.
- Non-GAAP adjusted EBITDA loss improved over \$17 million in the quarter and over \$27 million in the first half of 2023. Operating cash use decreased over 70% to \$8.5 million in the second quarter of 2023 and decreased over 60% to \$17.7 million in the first half of 2023.
- Cash, cash equivalents, and short-term investments (including restricted cash) on June 30, 2023, totaled \$143 million.

"I am pleased to report our second quarter results and the visible improvement to many of our key performance metrics, especially in light of an uncertain macroeconomic environment," said Michael Egholm, PhD, President and Chief Executive Officer of Standard BioTools™. "The growth of our top line comes directly from disciplined sales execution and better overall operating efficiency across the organization," Egholm said. "This has also allowed us to design and successfully launch the Hyperion XTⁱ™ Imaging System, and we are encouraged by early customer traction.

"Continued success will come from building out our operational systems that deliver a portfolio of high value, high margin tools and solutions to researchers at a profit, while attracting personnel that fully embrace a lean culture and can execute at the highest level. In the last year we have completely transformed our senior management team to this standard and are now seeing in this quarter the early signs and benefit of having done so."

A reconciliation of non-GAAP gross margins, non-GAAP operating expenses, and non-GAAP adjusted EBITDA is provided in the financial schedules that are part of this press release. An explanation of these non-GAAP financial measures is also included below under the heading "Use of Non-GAAP Financial Information."

Business Update

Proteomics: Following the launch of the Hyperion™ XTⁱ Imaging System in April, the company shipped its first revenue units in the quarter with a growing order backlog. This system provides a market-leading performance with the highest data quality available in spatial proteomics and industry-leading shortest time to results.

Genomics: The company launched an upgrade to its X9™ High-Throughput Genomics System to enable next-generation sequencing (NGS) library preparation on the system to support discovery through screening. Customers can create NGS libraries and assess the quality and quantity in a single workflow ahead of expensive NGS runs. This unified approach has the potential to catch any errors earlier and ensure that samples will not go to waste.

Corporate: The company announced Jeff Black as its new Chief Financial Officer and Agnieszka (Aggie) Gallagher as Senior Vice President and Chief Legal Officer.

Conference Call Information

The company's management will host a conference call and webcast today at 2:00 p.m. PT, 5:00 p.m. ET, to discuss second quarter 2023 financial results and operational progress as well as to provide additional color on its strategic actions.

Individuals interested in listening to the conference call may do so by dialing:

US domestic callers: (888) 346-3970

Outside US callers: (412) 902-4297

Live audio of the webcast will be available online from the Investor Relations page of the company's website at [Events & Presentations](#). The webcast will be archived and available on the Standard BioTools Investor Relations page at investors.standardbio.com.

Our investor presentation including Supplemental Financial Information has been posted on the investor relations section of our website concurrent with this news release.

Use of Non-GAAP Financial Information

Standard BioTools has presented certain financial information in accordance with U.S. GAAP and also on a non-GAAP basis. The non-GAAP financial measures included in this press release are non-GAAP gross margin, non-GAAP operating expenses, and adjusted EBITDA. Management uses these non-GAAP financial measures, in addition to GAAP financial measures, as a measure of operating performance because the non-GAAP financial measures do not include the impact of items that management does not consider indicative of the Company's core operating performance. Management believes that non-GAAP financial measures, taken in conjunction with GAAP financial measures, provide useful information for both management and investors by excluding certain non-cash and other expenses that are not indicative of the company's core operating results. Management uses non-GAAP measures to compare the company's performance relative to forecasts and strategic plans and to benchmark the company's performance externally against competitors. Non-GAAP information is not prepared under a comprehensive set of accounting rules and should only be used to supplement an understanding of the company's operating results as reported under U.S. GAAP. Standard BioTools encourages investors to carefully consider its results under GAAP, as well as its supplemental non-GAAP information and the reconciliations between these presentations, to more fully understand its business. Reconciliations between GAAP and non-GAAP operating results are presented in the accompanying tables of this release.

Use of Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including, among others, guidance, including related to revenues, margin, and operating expenses, and statements regarding future financial performance and expectations, operational and strategic plans, deployment of capital, our cash runway and sufficiency of cash resources, potential M&A activity, and expectations with respect to our restructuring plans (including expense reduction activities). Forward-looking statements are subject to numerous risks and uncertainties that could cause actual results to differ materially from currently anticipated results, including but not limited to risks that we may not realize expected cost savings from the restructuring, including the anticipated decrease in operational expenses, at the levels we expect; possible restructuring and transition-related disruption, including through the loss of customers, suppliers, and employees and adverse impacts on our development activities and results of operation; restructuring activities, including our subleasing plans, customer and employee relations, management distraction, and reduced operating performance; risks that internal and external costs required for ongoing and planned activities may be higher than expected, which may cause us to use cash more quickly than we expect or change or curtail some of our plans, or both; risks that our expectations as to expenses, cash usage, and cash needs may prove not to be correct for other reasons such as changes in plans or actual events being different than our assumptions; changes in Standard BioTools' business or external market conditions; challenges inherent in developing, manufacturing, launching, marketing, and selling new products; interruptions or delays in the supply of components or materials for, or manufacturing of, Standard BioTools products; reliance on sales of capital equipment for a significant proportion of revenues in each quarter; seasonal variations in customer operations; unanticipated increases in costs or expenses; uncertainties in contractual relationships; reductions in research and development spending or changes in budget priorities by customers; uncertainties relating to Standard BioTools' research and development activities, and distribution plans and capabilities; potential product performance and quality issues; risks associated with international operations; intellectual property risks; and competition. Information on these and additional risks and uncertainties and other information affecting Standard BioTools' business and operating results is contained in its Annual Report on Form 10-K for the year ended December 31, 2022, and in its other filings with the Securities and Exchange Commission. These forward-looking statements speak only as of the date hereof. Standard BioTools disclaims any obligation to update these forward-looking statements except as may be required by law.

About Standard BioTools Inc.

Standard BioTools Inc. (Nasdaq:LAB), previously known as Fluidigm Corporation, is driven by a bold purpose – *Unleashing tools to accelerate breakthroughs in human health*. Standard BioTools has an established portfolio of essential, standardized next-generation technologies that help biomedical researchers develop medicines faster and better. As a leading solutions provider, the company provides reliable and repeatable insights in health and disease using its proprietary mass cytometry and microfluidics technologies, which help transform scientific discoveries into better patient outcomes. Standard BioTools works with leading academic, government, pharmaceutical, biotechnology, plant and animal research, and clinical laboratories worldwide, focusing on the most pressing needs in translational and clinical research, including oncology, immunology, and immunotherapy.
